LIBERTY FORMULARY PREVENTIVE MEDICATION LIST

This preventive medication list is a subset of formulary products that are commonly prescribed for preventive purposes. Preventive medications help protect against or manage a medical condition. Coverage of all medications may still be subject to your high deductible health plan (HDHP) limits, benefit requirements, exclusions and out-of-pocket requirements.

Capital Rx works with your plan to provide HSA Advantage Plan members certain medications at the Signature co-pay. These are medications used to help reduce the risk or treat chronic conditions. Not all strengths, dosages, or categories of medications are provided at the Signature Plan copay; therefore, be sure to refer to the formulary for complete list of covered medications. Please visit <https://enrollment.cap-rx.com/?client=kansashealthsystem> to view a complete list of formulary medications or to find out how much your medications may cost you. If there are any questions about your particular prescription drug benefits, please call 1-833-599-0951.

Please note: A prescription is required for over-the-counter (OTC) product coverage without cost-sharing under the pharmacy benefit.

- Brand name products are CAPITALIZED.
- Generic products are listed in lowercase.
- Medications that require Prior Authorization or Step Therapy are indicated with an *.
- Some strengths and/or formulations may not be covered.
